Provident BANK

CASE STUDY

Provident Bank

How Provident Bank reduced their carbon footprint, streamlined energy decision making with UtilityROI™, and saved over \$60,000/year in the process.

OVERVIEW

Provident Bank was seeking a comprehensive energy management solution. Their goal was to obtain more competitive energy supply rates, identify a software solution to make tracking energy spend and conservation across their 90+ locations easier, and explore ways to reduce their carbon footprint.

GREENCROWN SOLUTION

Greencrown sourced competitive electric and natural gas supply for Provident, which was inclusive of a 100% Green-e® certified Renewable Energy Certificate offset to fully eliminate their carbon footprint. Greencrown's UtilityROI™ Platform was introduced to allow deep insight into energy spend, conservation measures, and sustainability targets across the 90+ locations.

MEANINGFUL RESULTS

GENERATED SAVINGS

Delivering over \$60,000 in annual electricity and natural gas savings across 90+ branch portfolio

REDUCED CARBON EMISSIONS

Offset electric consumption by 100%, by procuring Green-e® Certified Renewable Energy Certificates for each MWh of power consumed

SIMPLIFIED REPORTING WITH UTILITYROI™

Real time reporting for energy data management and sustainability performance, and M&V for efficiency projects

BANKING INDUSTRY

90+ BRANCH LOCATIONS IN NJ & PA

ELECTRIC & NATURAL GAS SUPPLY

SUSTAINABILITY THROUGH GREEN-E®

"Greencrown Energy & Water has been a valuable asset to our bank. They were able to negotiate attractive power prices for all of our branches, help us meet our sustainability goals, and made understanding our utility spend much easier with their UtilityROI™ software platform" – VP, Retail Property Manager, Provident Bank, NJ
